OFFICE OF THE PRIVATE SECRETARY TO HIS EXCELLENCY THE VICEROY.

NOTIFICATION.

New Delhi, the 4th March 1942.

No. 44-H.—His Excellency the Viceroy has been pleased to award the Indian Police Medal to the following officer:—

Bengal.

Radha Prosad Pandey, Constable No. 1493, of the 24-Parganas District.—On the night of the 20th November 1941 Constable Radha Prosad Pandey, while on patrol duty with a Head Constable, heard sounds of gun-fire and cries of alarm in the distance. He and the Head Constable ran to the place whence these sounds came, and found that a dacoity was in progress in a house there, the inhabitants of which were putting up a spirited resistance. On their arrival the dacoits fled, and although none of the inhabitants came to their assistance, these two Police officers gave chase, despite the fact that they had reason to believe that the dacoits were armed with guns. Constable Pandey succeeded in overtaking and pulling down one of the dacoits, who seriously wounded him by stabbing him in the thigh with a dagger. Despite this injury the Constable clung on to his adversary until the Head Constable arrived and felled the latter with a lathi. Constable Pandey showed great promptitude and initiative and his conduct was of a most gallant character.

This award is made for gallantry under regulation (*d*) (*i*) of the regulations governing the grant of the Indian Police Medal and consequently carries with it the allowance admissible to officers of and below the rank of Inspector of Police.

PART VI

Bills introduced in the Council of State and Legislative Assembly; Reports of Select Committees presented to the Council and Assembly; and Bills published under Rule 18 of the Indian Legislative Rules

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly, on the 14th February, 1942:—

L. A. BILL No. 11 OF 1942.

A Bill to limit rates of interest and for that purpose further to amend the Usurious Loans Act, 1918.

WHEREAS it is expedient to limit the rates of interest and for that purpose further to amend the Usurious Loans Act, 1918; It is hereby enacted as follows:— X of 1918.

Short title.

1. This Act may be called the Usurious Loans (Amendment) Act, 19 .

Amendment of section 3, Act X of 1918.

2. In section 3 of the Usurious Loans Act, 1918 (hereinafter referred to as the said Act),— X of 1918.

(*1*) in sub-section (*1*),—

(*a*) in clause (*a*), for the word "and" occurring at the end the word "or" shall be substituted;

(*b*) for the words "may exercise all or any of the following powers" the words "shall exercise all the following powers or all such of them as may not be inappropriate to the case" shall be substituted; and

(*c*) in the proviso,—

(*i*) the brackets and figure "(*i*)" occurring in clause (*i*) shall be omitted; and

(*ii*) clause (*ii*) shall be omitted;

(*2*) in sub-section (*2*),—

(*a*) for clause (*a*) the following shall be substituted, namely:—

"(*a*) In this section, 'excessive' means—

(*i*) in excess of interest calculated at the rate of six per cent. per annum with annual rests or

(*ii*) if the Reserve Bank of India's rate at the date of the loan exceeds three per cent. per annum, in excess of interest calculated at three per cent. above such Reserve Bank rate with annual rests:

Provided that if the Court considers that having regard to the risk incurred as it appeared, or must be taken to have appeared to the creditor at the date of the loan a lower rate of interest was reasonable, all interest in excess of such rate shall be deemed 'excessive' "; and

(*b*) the *Explanation* shall be omitted; and

(*3*) to sub-section (*3*) the following shall be added at the end, namely:—

"or if such suit is instituted by a debtor for any of the reliefs specified in sub-section (*1*) of section *3*".

Amendment of section 4, Act X of 1918.

3. In section 4 of the said Act, for the words "may exercise" the words "shall exercise" shall be substituted.

Insertion of new section 5 in Act X of 1918.

4. After section 4 of the said Act, the following section shall be added, namely:—

Punishment for evasion of Act relating to maximum rates of interest.

"5. Any person who evades or attempts to evade the provisions of this Act prescribing the maximum rate of interest by actually lending a smaller sum than that shown in the agreement or instrument executed by the debtor or in any other manner whatsoever, shall be punishable with fine not exceeding the sum of (*a*) one thousand rupees and (*b*) twice the amount which has been paid to him in consequence of such evasion or would have been paid to him if the attempted evasion had been successfully carried out."

STATEMENT OF OBJECTS AND REASONS.

It is an admitted fact that the high rate of interest forms a heavy burden and is one of the chief causes of agricultural indebtedness. It is also well-known that low rates of interest prevailing in the cities have little effect on the usurious rates prevailing in the rural areas. The object of the Bill is to limit the rate of interest and thus relieve the masses from the exploitation and extortion of moneylenders. The simplest method of doing this is to amend the Usurious Loans Act, 1918. The measure has been adopted in certain Provinces but in a matter like this uniformity is greatly needed.

MOHD. AHMAD KAZMI.

MD. RAFI,

Secy. to the Govt. of India.

GOVERNMENT OF INDIA.

Legislative Assembly Department.

The following Bill was introduced in the Legislative Assembly, on the 16th February, 1942:—

L. A. BILL No. 13 OF 1942.

A Bill to provide for the extension of the time limited by or under the Indian Patents and Designs Act, 1911, for the doing of acts thereunder.

WHEREAS it is expedient to provide for the extension of the time limited by or under the Indian Patents and Designs Act, 1911, for the doing of acts thereunder; II of 1911.

It is hereby enacted as follows:—

Short title, extent and duration.

1. (*1*) This Act may be called the Indian Patents and Designs (Extension of Time) Act, 1942.

(*2*) It extends to the whole of British India.

(*3*) It shall be in force until the termination of the present hostilities and for one year thereafter.

Power to extend time limits having regard to war circumstances.

2. (*1*) The Controller of Patents and Designs appointed under the Indian Patents and Designs Act, 1911, may, subject to such conditions, if any, as he thinks fit to impose, extend the time limited by or under that Act for doing any act, where he is satisfied— II of 1911.

(*a*) that the doing of the act within the time so limited was prevented by a person's being on active service or by any other circumstances arising from the existence of the present hostilities which, in the opinion of the Controller, justify an extension of the time so limited, or

(*b*) that, by reason of circumstances arising from the existence of the present hostilities, the doing of the act within the time so limited would have been or would be injurious to the rights or interests of the person by or on whose behalf the act is or was to be done or to the public interest.

(*2*) An extension under this section of the time for doing any act—

(*a*) may be for any period that the Controller thinks fit, notwithstanding that under the Indian Patents and Designs Act, 1911, power is conferred to extend the time for doing that act for a specified period only; and II of 1911.

(*b*) may be granted, notwithstanding that that time expired before any application or request for extension was made, or that, by reason of that act not having been done within that time, the relevant application, patent, registration or proceeding has ceased or expired, or become void or invalid, or been treated as abandoned, or been refused.

STATEMENT OF OBJECTS AND REASONS.

It has been demonstrated that applicants under the Indian Patents and Designs Act, 1911, have been prevented from completing the proceedings instituted by them under certain sections, *e.g.*, section 14(*2*), section 78A(*1*), etc., of the Act within the time-limits prescribed, on account of their participation in the war or on account of conditions arising out of the war. The proceedings have thereupon been deemed to have been 'refused' or 'abandoned'. The object of the present Bill is to confer powers on the Controller of Patents and Designs to extend the time-limits in such cases so as to enable the applicants to revive the proceedings originally instituted by them if they so desire.

Temporary regulations for the prevention and control of cholera.

1. In these regulations, unless there is anything repugnant in the subject or context:—

(*a*) "Health Officer" means the Health Officer of the Municipality;

Notices.

3. If in any case the Health Officer or a Sanitary Inspector considers that the issue of a notice under these regulations is likely to lead to such an amount of delay as might facilitate the spread of cholera he may forthwith take such steps as he may think fit for carrying out the work, and shall thereafter, as soon as possible, issue a notice on the person concerned stating the reason why such work has been carried out.

4. If any measure which the Health Officer or a Sanitary Inspector has, by a notice issued under these regulations, required to be carried out, be not carried out to his satisfaction within the time stated in the notice the Health Officer or a Sanitary Inspector shall be entitled to carry out the measure.

Costs and compensation.

5. (1) All expenses incurred in carrying out any work in pursuance of an order issued under these regulations shall be paid by the municipality except in any case where the order directs a person to carry out any work in relation to property in his possession, in which case the expenses shall be paid by that person:

Provided that where the conditions, which led the Health Officer or a Sanitary Inspector to pass such an order, are not attributable to any act or default of the persons in possession of the property, the municipality may pay to such person the whole or a part of expenses incurred by him in carrying out the order.

(2) The municipality may recover all expenses incurred by the Health Officer or a Sanitary Inspector in carrying out the measure under regulation 4 from the person or persons to whom the notice was originally issued.

6. The municipality shall pay adequate compensation to any person who has sustained substantial loss or damage by reason of anything done under these regulations:

Provided that no person shall receive any compensation for anything done or suffered under these regulations, if he has failed to carry out an order issued under these regulations within the time specified in the order and to the satisfaction of the Health Officer or a Sanitary Inspector.

He shall not direct the patient to be removed from the house unless it is in his opinion impossible to make proper arrangements for his isolation therein.

12. The Health Officer or a Sanitary Inspector may order that any person, who has in his opinion been exposed to infection from cholera, shall take such drugs in such quantities as may be specified by the Health Officer or a Sanitary Inspector or shall submit himself to anti-cholera inoculation within a time to be specified in the order.

13. No person shall enter any place wherein a patient is isolated under regulation 11 without the permission of the Health Officer or a Sanitary Inspector.

14. The municipality shall provide free of charge suitable places, with necessary attendants, medicine, diet and other necessaries for persons isolated under regulation 11: Provided that a private individual may provide places certified by the Health Officer or a Sanitary Inspector as being fit for the purpose of such isolation.

14A. If it is not possible for the municipal commissioners to provide suitable places with necessary attendants, diet and other necessaries for isolation of the patient or if satisfactory arrangement for such isolation is not also possible in the house where the patient is staying, the patient shall be sent, under proper sanitary precautions, to the hospital within or outside the nearest municipality where there is suitable arrangement for isolation.

15. No person, who is or has been suffering from cholera, shall leave the place where he has been staying until he has received from the Health Officer or a Sanitary Inspector written permission to do so.

16. The Health Officer or a Sanitary Inspector may require any person to allow to be carried out by such agency and within such time as may be specified in the order, such measures for the disinfection or evacuation of any premises in the occupation of such person or for the disinfection or destruction of any of his personal effects, as the said officer or inspector may consider necessary.

18. The Health Officer or a Sanitary Inspector may forbid any person who has been a patient or who has, to his knowledge, been in contact with a patient, to act as vendor of any article for such period as may be specified in the order.

18A. No person shall carry or permit to be carried in a public conveyance a patient except in the case where a patient is carried with proper precautions to a hospital.

19. No person shall sell any article which has been in contact with a patient until it has been disinfected to the satisfaction of the Health Officer or a Sanitary Inspector.

19A. No person shall expose in any street, shop, bazar or any public place any clothing, bedding or other article which has been in contact with a patient or shall cause or suffer such article to be carried in any public conveyance, but nothing in this regulation shall apply to a person who transmits with proper precautions against spreading the disease any such article for the purpose of having the same disinfected.

19B. No person shall carry or permit to be carried in a public conveyance the dead body of any person who has died of cholera without the previous written permission of the Health Officer or a Sanitary Inspector, and without taking proper precautions against spreading the said disease.

Water-supply.

20. (*1*) When the Health Officer or a Sanitary Inspector is of opinion that the water in any well, tank, pool or other possible source of water-supply is contaminated or is likely to be contaminated, he may at once take such steps as he deems necessary to close such well, tank, pool or other source of water-supply, or may require the owner or occupier of land upon which such well, tank, pool or source of water-supply is situated, to take steps to close the same to the satisfaction of the Health Officer or the Sanitary Inspector, as the case may be, within such time as may be specified in the order.

(*2*) The Health Officer or a Sanitary Inspector may require such owner or occupier to keep closed during such a period as shall be specified in the order any well, tank, pool or other sources of water-supply closed under paragraph (*1*) of this regulation.

Explanation.—In this regulation, "to close" includes the placing of watchman to prevent access to the well, tank, pool or other source of water-supply.

21. When the Health Officer or a Sanitary Inspector is of opinion that the water in any well, tank, pool or source of water-supply is contaminated he may disinfect it or order its owner or occupier to disinfect it with such disinfectants as he may specify in such quantities and at such times as he may think fit.

22. The Health Officer or a Sanitary Inspector may prohibit persons from entering into or using for drinking, bathing, or any other purpose, during such period as may be specified in the order, the water in any well, tank, pool or other possible source of water-supply, which, in his opinion, is contaminated or likely to be contaminated.

23. The Health Officer or a Sanitary Inspector may, by an order published at such places as he may think fit, set apart any well, tank, part of a river, stream or channel not being private property, or being private property with the consent of the owner, for the supply of water for drinking or culinary purposes and may prohibit therein or within a distance therefrom to be stated in the order all bathing, washing of clothes or animals, or other acts calculated to pollute the water; and may similarly set apart any well, tank, part of a river, stream or channel for the purpose of bathing or for the purpose of washing animals or clothes or for any other purpose connected with the health and cleanliness of the people using such water-supply.

24. The Health Officer or a Sanitary Inspector may prohibit persons from easing themselves, or throwing, depositing or discharging any rubbish, sewage or offensive matter, into any well, tank, pool or other source of water-supply, which is used by the public, or within such a distance from such well, tank, pool or source of water-supply as he may fix.

Conservancy and sewage disposal.

25. The Health Officer or a Sanitary Inspector may (1) prohibit the committal or continuance of any nuisance, or (2) require the person causing any nuisance or the person occupying the premises on which any nuisance exists to remove such nuisance.

Explanation.—In this regulation, "nuisance" means anything which in the opinion of the Health Officer or Sanitary Inspector is likely to spread or to cause the outbreak of cholera.

26. Whenever the Health Officer or a Sanitary Inspector is satisfied that the condition of any privy, urinal, drain, sewer or cesspool is such as to cause risk of spreading cholera to the inhabitants of the neighbourhood he may order the occupier of the land in which such privy, urinal, drain, sewer or cesspool is situated to disinfect, or to allow an officer of the municipality to disinfect, the same with such disinfectants in such quantities and at such time as the said officer or inspector shall think fit.

27. The Health Officer or a Sanitary Inspector may for the prevention of the outbreak or spread of cholera order the owner or occupier of any land to repair or make efficient to the satisfaction of that officer or inspector any drain, sewer, privy, urinal or cesspool which is situated upon such land or to remove any such drain, sewer, privy, or urinal or close any such cesspool within such time as may be fixed by the said officer or inspector.

Miscellaneous.

28. The Health Officer or a Sanitary Inspector may during the prevalence of any outbreak of cholera order that any market, shop or other public place shall remain closed for such time as may appear to him to be necessary and

may forbid the holding of any fair, *mela* or other gathering to which people from surrounding places commonly or periodically resort.

29. The Health Officer or a Sanitary Inspector may require the owner or occupier of any land to clear and remove, within the period specified in the order, any vegetation upon such land the existence of which in the opinion of the said officer or inspector conduces to the committing of nuisances upon such land.

30. The Health Officer or a Sanitary Inspector may issue general orders that by a specified date certain sanitary precautions of a simple nature, such as lime-washing of houses, clearing of latrines or the removal of filth or rubbish shall be carried out to his satisfaction.

31. The Health Officer or a Sanitary Inspector may prohibit persons from retaining or selling clothes taken from the bodies of persons who have died of cholera and may cause any such clothes to be destroyed.

32. No person shall, without the written permission of the Health Officer or a Sanitary Inspector dispose of any corpse except by burning or burial.

33. The Health Officer or a Sanitary Inspector may approve burning or burial grounds and may by order direct either generally or specially in respect to any specified area, that corpses shall not be burned or buried at places other than those so approved by him.

34. Any person burning or causing to be burnt any corpse shall cause the same to be completely reduced to ashes, and shall likewise cause the clothes or other articles brought with such corpse to be reduced to ashes.

35. The Health Officer or a Sanitary Inspector may direct that no person shall bury or cause to be buried any corpse which, in the opinion of the Health Officer, is likely to spread cholera, in a grave, not constructed of masonry and less than six feet deep.

36. The Health Officer or a Sanitary Inspector may order that no *dome* or other servant of the municipality employed for the disposal of corpses shall withdraw from his duties without the permission of the Health Officer or a Sanitary Inspector unless such *dome* or other servant of the municipality has given notice in writing not less than one month previously of his intention so to withdraw.

37. The Health Officer or a Sanitary Inspector may through any person authorised by such officer or inspector in that behalf seize and dispose of any corpse, which in the opinion of the said officer or inspector, is infected with or is likely to spread cholera, unless the relatives or friends of the deceased person satisfy him that they are prepared and able to dispose of the corpse in a manner which will prevent the spread of cholera.

38. (*1*) The Health Officer or a Sanitary Inspector may require any person who appears to be acquainted with facts in connection with any case of cholera or suspected cholera to attend before him at a time to be stated in the order and at any place not more than one mile from the place where such person resides or is staying when the order is issued, and such person shall appear as so required.

(*2*) When the person summoned to appear under paragraph (*1*) is a female who, by the custom of the country, does not appear in public suitable precaution shall be taken to respect the said custom.

39. (*1*) The Health Officer or a Sanitary Inspector may examine orally any person who appears to be acquainted with the facts and circumstances of a case of cholera or suspected cholera.

(*2*) When the person to be examined under paragraph (*1*) is a female who, by the custom of the country, does not appear in public, the officer shall take her statement under such conditions as shall admit of due respect to the said custom.

(*3*) Such person shall be bound to answer all questions relating to such case put to him or her by such officer, other than questions the answers to which would have a tendency to expose him or her to any criminal charge.

40. The Health Officer or a Sanitary Inspector may, with such assistants (if any) as he thinks fit, enter upon any land, or after two hours' notice in writing, into any premises or building used for human habitation at any time between sunrise and sunset for the purpose of carrying out any measure or making any enquiries authorised by these regulations.

41. The crew of any inland steam vessel or boat which plies in any canal or river and other persons residing on such vessel or boat shall be subject to these regulations.

42. All inoculations under these regulations shall be performed gratuitously.

43. (*i*) Orders issued by the Health Officer or a Sanitary Inspector under these regulations shall be in writing.

(*ii*) The officer issuing such orders shall cause copies of them to be served upon any persons named in them.

(*iii*) The nearest relative of a patient or the occupier of the house in which the patient is staying shall, if a copy of the order under regulation 11 has been served upon him, give to the nearest Sanitary Inspector or to his office, immediate notice of any disobedience of the order by the patient.

3. No. 370L.—3rd April 1942.—The Governor having been pleased to order, under rule 47 of the Bengal Legislative Assembly Procedure Rules the publication of the following Bill, together with the Statement of Objects and Reasons which accompanies it, in the *Calcutta Gazette*, the Bill and the Statement of Objects and Reasons are accordingly hereby published for general information.

THE BENGAL LOCAL SELF-GOVERNMENT ASSOCIATIONS (RECOGNITION) AMENDMENT BILL, 1942.

to amend the Bengal Local Self-Government Associations (Recognition) Act, 1936.

WHEREAS it is expedient to amend the Bengal Local Self-Government Associations (Recognition) Act, 1936, for the purpose and in the manner hereinafter appearing ; Ben. Act XVI of 1936.

It is hereby enacted as follows :—

Short title.

1. This Act may be called the Bengal Local Self-Government Associations (Recognition) Amendment Act, 1942.

Amendment of section 4 of Bengal Act XVI of 1936.

2. In section 4 of Bengal Local Self-Government Associations (Recognition) Act, 1936,—

(a) after the words " a general meeting " the words " or a meeting of an executive committee " shall be inserted, and

(b) for the words " the meeting " the words " such a meeting " shall be substituted,

and to the said section the following proviso shall be added, namely :—

" Provided that travelling expenses shall not be paid to a member of a local authority for attending in one year more than three meetings of an executive committee referred to in this section."

STATEMENT OF OBJECTS AND REASONS.

Under the existing provisions of the Bengal Local Self-Government Associations (Recognition) Act, 1936, a member of a local authority, which contributes to the funds of an association recognized under the Act, may be paid, out of the respective local fund, travelling allowance for attending a general meeting of the association as a representative of that local body. He cannot, however, be allowed the travelling expenses for attending any other meeting of the association.

If such an association is to function properly the members of its Executive Committee have to meet from time to time. In order to facilitate the holding of such meetings it is proposed to amend the Act so as to empower the local authorities concerned to pay the travelling expenses of their representatives on such committees, from their own funds for attending not more than three meetings of the Executive Committee of an Association in any one year.

The manner in which the Committee will discharge its duties is as follows:—

The members will not visit the hospitals individually; the Committee will form itself into groups of not less than five members, each group in turn will, according to a roster to be kept for the purpose, visit the hospital on a fixed day and at a fixed time in each month. In addition to these visits at fixed times the members will pay unexpected visits to the hospitals, provided that they do not go at times which are inconvenient to the hospital authorities. If all the five members of the group are not present, the remaining members can go round without the absentee or absentees, as the case may be. The members constituting the group should inspect the internal arrangements and offer such suggestions regarding the administration of the institution as they think proper.

A visitors' book will be kept in the hospitals in which the recommendations of the Committee will be recorded. The Superintendent will note on the margin, the action taken on each recommendation with any other remarks or explanations that he may wish to offer. He will transmit a copy of the entries without delay to the Surgeon-General with the Government of Bengal for consideration. The Surgeon-General will take such further action as may seem necessary and will bring to the notice of Government any matter which he thinks sufficiently important.

The Committee as a whole will meet at least once a quarter, review the reports of the visiting groups and discuss the remedial measures adopted. The Superintendent of the Medical College Hospitals should attend the meetings of the Visiting Committee.

The Committee will send copies of the resolutions passed at their quarterly meetings to the Secretary to the Government of Bengal, Department of Public Health and Local Self-Government, and also to the Surgeon-General with the Government of Bengal, who will submit to Government a report of the action taken or proposed to be taken on the points raised in those resolutions.

A. AHMAD,
Personal Assistant to Director of Agriculture, Bengal.

Dacca, the 13th April 1942.

DEPARTMENT OF AGRICULTURE, BENGAL

Ramna, Dacca, the 2nd April 1942.

Forecast of the Rabi Crops of Bengal for the year 1941-42.

(*Note.*—On average of the five years ending 1939-40, the area under summer rice in Bengal has represented some 0·5 per cent. of the total area under rice in India.)

Character of the season.—Field operations and sowings commenced under favourable weather conditions. At advanced stage of the growth, however, the crops in certain areas were adversely affected by drought. Some damage is also reported to have been caused by insect-pests.

Acreage.—The normal area under the different *rabi* crops dealt with in this forecast is estimated at 3,751,400 acres. The area actually sown this year is reported to be 3,588,900 acres as against 3,579,500 acres (revised) last year. Of this, the area under summer rice is reported to be 443,600 acres as against 437,400 acres last year, and that under tobacco is 321,500 acres as against 321,800 acres last year.

Outturn.—According to the District Officers' estimates, the average outturn of the different *rabi* crops for the province, as a whole, works out at 82 per cent. of the normal as against 75 per cent. last year, while the outturns for the more important *rabi* districts are as follows:—

Mymensingh 100, Dacca 95, Rangpur 79, Murshidabad 84, Faridpur 76, Pabna 69, Noakhali 70, Rajshahi 67, Bakarganj 92, Tippera 79, Nadia 74, Jalpaiguri 89, Malda 79, and Bogra 80 of the normal.

Summer rice and tobacco crops.—The outturn of summer (*boro*) rice for the province as a whole according to the District Officers' estimates is 93 per cent. of the normal as against 88 per cent. last year. The gross yield of the crop for the province on a basis of the normal yield of 14½ maunds of clean rice per acre is estimated at 217,200 tons this year as against 202,700 tons last year.

The outturn of tobacco crop is estimated at 82 per cent. of the normal as against 77 per cent. last year. Taking 986 lbs. as the normal yield of the crop per acre, the gross yield of the crop for the province this year is estimated at 116,000 tons this year as against 108,300 tons last year.

PRESS COMMUNIQUE.

8, Clive Street, Calcutta, the 2nd April 1942.

Price of special quality atta manufactured by the Hindusthan Atta Mills.

On the 19th March 1942, the Chief Controller of Prices, Bengal, issued an order fixing the selling price of red and white atta at Rs. 7-8 and Rs. 8-4 respectively *ex*-mill. There is one variety of red atta, viz., Chandausi atta manufactured by the Hindusthan Atta Mills which was not taken into consideration in fixing the selling price for red atta. This Chandausi atta is superior in quality to all ordinary red atta and is specially prepared by the stone grinding process as opposed to the roller grinding process. For the convenience of the public it has been decided to bring this atta also under control and to fix a price for it. The price of this atta has been fixed at Rs. 8-2 per maund *ex*-mill. The retail price would be about 12 annas higher. For details regarding prices, a reference may be made to the order issued by the Chief Controller of Prices, Bengal.

ORDER.

In exercise of the power conferred by rule 81 (*2*) (*b*) of the Defence of India Rules and in partial modification of the orders, dated the 19th March 1942, the price of red Chandausi atta manufactured by the Hindusthan Atta Mills, is fixed as follows:—

Red Chandausi atta.	Price *ex*-mill.	Wholesale bazar price.	Retail bazar price.
Hindusthan Atta Mills ..	Rs. 8-2-0 per maund.	Rs. 8-4-0 per maund	Rs. 8-14-0 per maund or 3 as. 7½ pies per seer.

Resolution on the Report of the Director of Public Health, Bengal, for the year 1940.

Public Health.

RESOLUTION—No. 693P.H.

CALCUTTA, THE 15TH APRIL 1942.

Read the Report of the Director of Public Health, Bengal, for the year 1940.

Vital Statistics.—There were 1,681,846 births registered in the year under report as against 1,597,651 in the preceding year—a rise of 84,195. The birth-rate was 33·7 per mille being 5·3 per cent. above the rate of 1939. 1,111,082 deaths were registered in 1940 as compared with 1,090,530 in the previous year—an increase of 20,552, the death-rate being 22·3 per mille and 1·8 per cent. above that of the preceding year. The total births exceeded the deaths by 570,764 against an excess of 507,121 in 1939. As in the previous year, Calcutta was the solitary district in which deaths exceeded births. The birth-rate in Bengal in the year under review was lower than in all other provinces except Bihar, Assam, North-West Frontier Province and Sind; so also was the death-rate except in the case of United Provinces and the other provinces mentioned. The highest birth-rate was recorded in the district of Nadia (42·3 per mille) followed by Murshidabad (41·9), and the lowest in Malda (24·6) which has been uniformly showing low birth-rates during the previous triennium. As in the past three years, the highest death-rate during the year under report, was recorded in the district of Darjeeling (31·3) while the lowest was recorded in Malda (15·7). The proportion of male births in every 100 female births was 108 against 107 in 1939, while the proportion of male deaths in every 100 female deaths was also 108 against 109 in 1939. The Director of Public Health, Bengal, has pointed out in this connection that the predominance of male births over female births is a feature common to all the provinces of this country though the ratio varies from province to province.

It must, however, be observed that, generally speaking the system of record of vital statistics in this country is by no means perfect or as satisfactory as it should be and the margin of inaccuracy which undoubtedly exists cannot be gauged. The question of evolving a sound system of collection of vital statistics in this province is however engaging the attention of the Public Health Department of Government.

Infantile and Maternal Mortality.—The total number of infantile deaths in 1940 was 267,894 compared to 234,301 in 1939. The infant mortality rate recorded an increase, being 159·3 per mille against 146·6 in 1939. The infantile deaths represented 24·1 per cent. of the total mortality in the province during the year under review. 55 per cent. of the infant mortality were recorded among infants under one month, 29·4 per cent. among infants between one and six months and 15·6 per cent. among those between six

and twelve months. There were 69,844 still-births registered in the year 1940, yielding a rate of 4·2 for every hundred live births as against 4·1 in 1939. Maternal causes were responsible for 15,758 deaths during the year under report as against 15,792 in the preceding year. Apart from the possibly large margin of inaccuracy in recording this class of deaths, there must have been many deaths associated with, but not ascribed to, child birth for which there is no adequate provision for registration.

Reference has been made, in the resolution reviewing the report for the year 1939, to a scheme, approved by Government, for establishment of maternity and child welfare centres in the rural areas providing a minimum standard of efficiency regarding staff, equipments, buildings, etc. The scheme has been explained at length in the report of the Director of Public Health for the year 1940. According to this scheme three new maternity and child welfare centres were opened during the year 1940 and suitable grants-in-aid were made by Government to the local bodies and voluntary associations concerned. Altogether 18 such centres functioned during the year under review. The Lady Superintendent for Maternity and Child Welfare, Bengal, appointed by Government, rendered assistance to the local bodies and others in formulating proposals for the establishment of maternity and child welfare centres and took steps to encourage the opening of such centres throughout the province. The Model Health Unit established by Government at Singur 1939 provided *inter alia* facilities for institutional service both for prenatal care and midwifery services. The annual grant for the training of indigenous dais was distributed among the different local bodies and other organisations as usual.

General Epidemiology.—Cholera.—A remarkable feature of the year under report was that the mortality from cholera was the lowest on record during the past fifty years. There were 21,743 deaths from this disease with a death-rate of 0·4 per mille as against 33,221 deaths in 1939 with a death-rate of 0·7 per mille—a decrease of 34·0 per cent. over the figures of 1939. Cholera accounted for only 2 per cent. of the total provincial deaths in 1940. The highest death-rates were registered in the districts of Khulna (2·07 per mille), Bakarganj (1·91), 24-Parganas (0·93) and Howrah (0·75). As in the preceding years, no deaths from cholera occurred in Darjeeling. The rural areas recorded 19,884 deaths representing a death-rate of 0·4 per mille against 0·6 per mille in the previous year. The number of deaths in towns was 1,859 with a death-rate of 0·5 per mille compared to 0·9 in 1939.

Cholera preventive measures.—The usual preventive measures were taken. Anti-cholera vaccine was freely used, though the number of inoculations performed fell considerably due to the less severity of cholera epidemics in 1940 as compared with the previous year. The Director of Public Health deputed, as in the preceding years, a number of mobile medical and sanitary units for anti-cholera and other epidemic work. Assistance was also rendered to the local authorities by lending services of medical and sanitary officers during epidemics.

Small-pox.—The mortality from this infectious disease showed a marked decline, the total number of deaths being 5,608 against 7,029 in the preceding year, with a death-rate of 0·11 and 0·14 per mille respectively. The mortality from small-pox thus fell by 20 and 64 per cent. compared with the year 1939 and the previous quinquennium respectively. In fact, the number of deaths from this disease has been steadily decreasing since 1936, as pointed out by the Director of Public Health, and was the lowest on record during the past thirty-five years excluding 1923 and 1924. Small-pox was responsible for only 0·5 per cent. of the total provincial mortality in 1940.

Of the total number of deaths from small-pox 447 occurred among infants under one year of age and 867 among children between one and ten years, against 408 and 748 respectively in 1939.

1,098 deaths from this disease out of a total of 2,393 in the urban areas were recorded in Calcutta alone where the death-rate (0·96 per mille) was, as in the previous two years, highest in the province. Compared with the year 1939, there was a fall of 23·8 per cent. in the motality in the urban areas. The rural areas accounted for 3,215 deaths in 1940 against 3,890 in 1939. The districts of Darjeeling, Rajshahi, Bogra and Malda were practically free from small-pox during the year under report, the lowest death-rate being registered in Darjeeling (0·003).

The number of persons vaccinated in 1940 was 8,476,920 against 7,925,382 in 1939. The increase is a happy sign which might have been due to the greater attention paid by the local authorities in the matter of vaccination than in the previous years. The total cost of vaccination increased from Rs. 4,61,790 in 1939-40 to Rs. 4,70,645 in 1940-41. The average cost of each successful vaccination in the province was 1 anna and 9 pies—a fall of one pie from the figure for the preceding year. The average cost of manufacture of vaccine lymph per dose of half a grain in the Bengal Vaccine Institute amounted to 0·5 pies only, which was cheaper by 0·1 pie than the cost in the previous year.

Fevers.—Malaria and Kala-azar.—Fevers took a heavier toll of lives in 1940 than in the preceding year, the number of deaths being 717,516 and 687,587 respectively and the death-rate being 14·4 and 13·8 per mille respectively against the quinquennial average of 14·8 per mille.

Malaria.—51·5 per cent. of the total mortality from fevers was due to malaria, which again accounted for 33·3 per cent. of the total provincial mortality during the year under review, the corresponding percentages in 1939 being 49·6 and 31·3 respectively. There were 369,448 deaths from malaria in 1940 against 341,321 in 1939, representing an increase of 8·2 per cent. The death-rate correspondingly went up from 6·8 to 7·4 per mille in the year under report. 99·5 per cent. of the deaths from malaria occurred in the rural areas and only 0·5 per cent. in the urban areas compared to 99·4 and 0·6 respectively in 1939. The district of Nadia topped the list with a death-rate of 18·35 per mille followed by Rajshahi (17·94) and Jessore (17·79), the highest death-rate in 1939 being recorded in Rajshahi, viz., 14·6. Calcutta returned the lowest rate, viz., 0·5 which was the same as in the previous year. It is worth noticing that the mortality from malaria in the urban areas has steadily come down from the year 1938, while the problem of malaria in the rural areas has assumed greater magnitude.

Kala-azar.—This disease was responsible for 15,453 deaths with a death-rate of 0·31 per mille as against 17·056 and 0·34 respectively in 1939. The decline in the mortality from kala-azar in the rural as well as urban areas of the province as compared to the previous year, is a welcome feature; the decrease in the number of deaths in the rural areas being 1,543 and that in the urban areas being 60. The highest mortality from the disease (1·3) was recorded in the rural areas of Dinajpur. The number of kala-azar cases admitted into the various hospitals and dispensaries for treatment rose from 98,155 in 1939 to 104,791 in 1940, the rise being large in the districts of Mymensingh, Malda and Khulna. The special anti-kala-azar scheme inaugurated in the district of Darjeeling in December 1937, continued to work satisfactorily during the year under review.

Special anti-malaria measures.—The survey and control measures in connection with the campaign against *anopheles ludlowii* were carried out satisfactorily, as in the previous year, in the Salt Lake area, Budge-Budge and the suburban areas with the co-operation of the Corporation of Calcutta and other local authorities and interests concerned.

The special anti-malaria scheme for the town of Jessore and its surrounding rural areas undertaken in the year 1939 was continued throughout the year under review with success.

Special investigation into the problem of malaria was taken in the year under report by the transfer of the Field Malaria Research Laboratory to Netrakona in the Mymensingh district and also to Kalimpong in the Darjeeling district in order to find out the local vectors and to investigate the various etiological factors responsible for the spread of malaria in the Netrakona subdivision and the mountain regions of Darjeeling respectively.

In accordance with the revised policy of Government to give liberal grants-in-aid to comprehensive anti-malaria schemes of a more or less permanent nature instead of making small grants towards temporary local measures, which has already been referred to in reviewing the report of the Director of Public Health for 1939, two anti-malaria schemes, viz., the Golapganj Drainage Scheme in the district of Malda and the Nadana Khal Re-excavation Scheme in the district of Noakhali, were sanctioned by Government during the year 1940 and a grant equivalent to half of the total estimated cost of these two schemes was made by Government, the other half being met by the district boards concerned. Certain other anti-malaria schemes of different districts were examined and approved by the staff of the Director of Public Health during the year under report before their submission to Government for sanction.

A Malaria Engineer was appointed by Government in the Public Health Department in March 1940 to assist local bodies in drawing up and executing anti-malaria schemes of an engineering type. During the year under review he scrutinized and advised on various comprehensive anti-malaria scheme submitted to the Director of Public Health by different district boards and municipalities of the province.

Respiratory Diseases.—The number of deaths attributed to respiratory diseases of all forms was 85,203 in 1940 as against 88,458 in 1939, the respective rate of mortality being 1·71 and 1·86 per mille. Calcutta, as usual, returned the highest death-rate (8·59), Jalpaiguri came next (5·15) followed by Howrah (3·33) and Hooghly (3·25). It is distressing to note that these districts have been recording high rates of mortality during the previous four years. Malda continued to record the lowest rate (0·26).

Pneumonia.—It accounted for 44,967 deaths against 47,888 in the preceding year, showing a reduction of 6·1 per cent. Pneumonia was responsible for 56·2 per cent. of the total mortality from respiratory diseases. As usual, the highest death-rate was registered in Jalpaiguri (4·2 per mille) and the lowest in Malda (0·1). High rates of mortality were recorded also in the districts of Hooghly, Calcutta, Darjeeling and Dinajpur.

Pulmonary tuberculosis.—This disease took a toll of 12,363 lives against 12,422 in 1939, the death-rates being the same in both the years, viz., 0·25 per mille. More than two-thirds of the total tubercular deaths in the urban areas occurred in Calcutta alone where the death-rate from the disease was 2·65 per mille. The town of South Dum Dum, however, returned the highest rate in the province (5·4 per mille) as in the previous two years. No deaths from tuberculosis were reported from 17 towns in the year under review.

A comprehensive scheme for the prevention and control of tuberculosis in the province, in co-operation with local bodies and voluntary organisations was formulated by the Director of Public Health. Two important items of the scheme, viz.—

(*i*) Special course of training in tuberculosis for medical and health officers and private practitioners, and

(*ii*) provision for better treatment and nourishment of tubercular patients in Sadar hospitals,

were already approved by Government and given effect to and suitable provisions were made for them in the Budget. Two more items of the scheme, viz.—

(*iii*) establishment and maintenance of chest clinics in Sadar hospitals, and

(*iv*) establishment of village isolation centres,

were also approved by Government towards the close of the year under review and suitable provision for the purpose was made in the budget of 1941-42.

The tuberculosis survey started in 1939 at Barisal and Serampore was continued during the year under report and a large number of persons were examined and attended. The Bengal Tuberculosis Association rendered as before valuable service by publicity and propaganda work in the province with the usual grant from Government and maintained six dispensaries in Calcutta and one in Howrah. The Association also organised post-graduate training courses on tuberculosis in Calcutta and assisted in the training of the students for the Diploma of Public Health and the Health Officers deputed by the Government of Bengal.

Other diseases.—Enteric fever.—Deaths registered as due to enteric fever were 7,875 as against 8,290 in 1939. The decrease was comparatively large in urban areas, but the rate of mortality was much higher in those areas than in the rural areas.

Influenza.—There were 2,127 deaths from influenza in 1940 compared to 2,467 in the preceding year. The fall in the number of deaths was solely due to the decrease in mortality in the rural areas, the total deaths in the urban areas being nearly the same as in the previous year. Another striking feature is that Calcutta alone was responsible for 85·5 per cent. of the total mortality in the urban areas.

Cerebrospinal fever.—It accounted for 1,378 deaths against 1,721 in 1939, showing a marked decline in mortality from the disease. 90·2 per cent. of the total deaths from cerebrospinal fever in the urban areas were recorded in Calcutta only. The comparatively large mortality in Calcutta is perhaps due to better classification of the causes of deaths by medical registrars.

Typhus fever.—The number of deaths from this disease further increased from 4,443 in 1939 to 5,183 in the year under report. Calcutta was, however, entirely immune from the disease.

Dysentery and diarrhœa.—These diseases respectively took a toll of 24,730 and 20,692 lives in 1940 as against 27,301 and 27,152 in 1939. There was thus an appreciable fall in the mortality from these diseases. Of the total provincial mortality in the year under review, 4·1 per cent. was attributed to dysentery and diarrhœa together as against 5 per cent. in the previous year.

Leprosy.—The number of recorded deaths from leprosy was 1,304 against 1,517 in 1939, representing a reduction of 14 per cent. The rural areas recorded 1,273 deaths from the disease during the year under report, the largest number of deaths having occurred in the district of Bankura. With a view to ascertaining the incidence of leprosy and suggesting measures for the control of the disease, a number of sample leprosy surveys were carried out by the British Empire Leprosy Relief Association in co-operation with the Public Health Department of Government. A training class in leprosy was conducted by this Association, which was attended by a good number of medical and health officers. The Association also carried on propaganda work with the usual grant from Government. As a first step towards the control and eradication of this fell disease, Government approved one of the important items of the comprehensive scheme prepared and submitted by the Director of Public Health, according to which a start was made in conjunction with several local authorities in the matter of establishment and maintenance of leprosy clinics mainly in rural areas.

Fairs and festivals.—The Director of Public Health has given an interesting account of the usual medical and sanitary arrangements made by the local authorities concerned in co-operation with the staff of the Director of Public Health, for the welfare of the pilgrims and the prevention of outbreaks of infectious diseases in the chief melas in the province, viz., Ganga Sagar, Nangalband, Sitakund, Tarakeswar and Allowakhawa melas. The St. John Ambulance Corps rendered valuable assistance at the Ganga Sagar Mela as in the previous years. It is gratifying to observe that no deaths from either cholera or small-pox occurred at these melas during the year under review.

Sanitation and water-supply.—Rs. 53,18,958 or 38·4 per cent. of the total receipts inclusive of the opening balance was spent by municipal bodies in Bengal on sanitary works during the financial year 1939-40, an increase of 0·8 per cent. compared with the expenditure in the preceding year. The average expenditure per head of the municipal population was Rs. 2-4-2 in 1939-40 which was practically the same in 1938-39. Of the total municipal expenditure on sanitation Rs. 24,68,518 was spent on conservancy, Rs. 12,80,798 on water-supply and Rs. 5,19,202 on drainage. The district boards in the rural areas continued to maintain their proportionate expenditure on water-supply, drainage, sanitation and vaccination, having spent 3·8, 0·2, 9·6 and 1·2 per cent. respectively of their total receipts during 1939-40 as compared to 3·9, 0·3, 9·7 and 1·2 per cent. during the previous financial year.

The union boards spent from their funds Rs. 8,18,515 on water-supply, Rs. 94,463 on drainage and Rs. 98,915 on conservancy in 1939-40 showing a large decrease on the first item and an increase on the latter two items over the expenditure in 1938-39.

According to the decision of Government to solve the problem of adequate supply of drinking water in the rural areas of the province within a limited period the preparation of comprehensive programmes of water-supply in the different districts was taken up in the year under review with the co-operation of the district boards and in consultation with the local water-supply committees set up for the purpose. Meanwhile, the annual grant for the improvement of rural water-supply, augmented as in the previous year, was distributed as usual among the different districts of the province.

The present skeleton public health organisation consisting of a public health unit in each thana under the charge of a Sanitary Inspector, which is being maintained by Government since 1927 has been found to be wholly inadequate for dealing with the manifold public health problems of the

province. A comprehensive scheme for complete reorganisation of the rural public health services was, therefore, framed by the Director of Public Health. The scheme, the fundamental principle of which is the combination of preventive and curative measures, envisaged the establishment of a treatment centre in each unit of two union boards to be placed in charge of a specially trained Rural Medical Officer of Health assisted by two Health Assistants and one qualified dai and the appointment of an Assistant Medical Officer for each subdivision, the entire public health work in a district being under the control and supervision of the District Health Officer who should be a Government servant. The scheme was under the consideration of Government. It was suggested to give effect to the scheme in selected areas but the district boards having expressed their unwillingness to co-operate in the scheme, this could not be given effect to, although suitable provision was made in the budget for the purpose.

School hygiene.—An account of the school health services at present provided for in Calcutta and in the municipal and rural areas has been given by the Director of Public Health and the results of the limited medical inspection of school students in these areas have been narrated. It should be noticed that the work of medical inspection of school children in Calcutta was transferred from the Education Department to the Public Health Department of Government with effect from 1st April 1940. During the year under review, 10,844 boys in 41 schools in Calcutta, 8,863 students in 125 schools in 26 municipalities and 1,750 boys and 72 girls in 54 schools in the rural areas were medically examined. The Sanitary Inspectors in charge of the rural public health circles also examined 207,988 pupils in 5,800 schools in the rural areas.

Health propaganda.—After the transfer of the Publicity branch of the Public Health Department to the Publicity Department of Government in 1939, Government took up the question of creation of a Health Education and Propaganda section under the Public Health Department. The Director of Public Health drew up a comprehensive scheme of Public Health Education and propaganda to be placed under his direct supervision under the direct administrative control of this department, as distinct and separate from the staff working under the Director of Public Information under the administrative control of the Publicity Department. No final decision could be reached on the scheme during the year under review. Pending decision on the scheme, however, one Artist and one Editor were employed during the year in connection with intensive and extensive public health education and propaganda. A weekly Public Health Bulletin was published throughout the year and posters, charts, models, etc., relating to public health propaganda were prepared and distributed as usual.

Miscellaneous.—The normal activities of the Public Health Department were maintained and their scope was widened in certain respects. Grants-in-aid were made to the local bodies as usual in order to enable them to make provision for health welfare services. Besides finding a moiety of the charge on account of Health Officers employed by the local bodies, a sum of Rs. 11½ lakhs was spent by Government in assisting district boards to maintain the existing rural public health organisation. The increased grant of Rs. 7½ lakhs from provincial revenues was repeated during the year under report for the improvement of rural water-supply. An allotment of Rs. 1,40,000 and Rs. 30,000 from the Government of India's second subvention for rural uplift was also made to the different districts for the improvement of rural water-supply and the improvement of rural sanitation respectively during the year under review. Other subsidies to local bodies included Rs. 1,20,000 for combating kala-azar and Rs. 50,000 for free vaccination as in the previous year and also an increased sum of Rs. 5 lakhs for the free distribution of

quinine. The usual grant of Rs. 10,000 to the Tuberculosis Association, Bengal, as well as to the Bengal Branch of the British Empire Leprosy Relief Association was also sanctioned. Assistance was rendered, as usual, by the Public Health Department to the local authorities during outbreaks of epidemic diseases, with extra staff, drugs and disinfectants.
